

Expert Insights Technology at its best

Our latest innovations mean that business travel is even more convenient when you have an expert on board...

At Corporate Traveller we are constantly investigating and trialling new technology that we feel will benefit our relationship with you and enhance your business travel. Take a look at some of the latest innovations that we are proud to make available to you:

SMS Functionality

We now have the capability to send itineraries, vouchers and confirmation details of your travels directly to your cell phone via SMS. This is very handy for changes while travelling or last minute requests that require urgent confirmation. We are also able to keep travellers updated with news and international travel alerts. The system is also programmed to send updates such as reminders to renew your passport a few months before it is set to expire.

E-ticket tracker

Corporate Traveller can track unused tickets. This means that if you have a ticket that is already issued but you are keeping it for later travels we can automatically keep track of when that ticket is going to expire and ensure that you are sent regular reminders. In this way no valid tickets will go unused which is a great money saver. We can also track any open ended tickets to ensure that return dates are booked before they expire.

Ticketing beyond borders

As a Corporate Traveller client we are able to issue tickets for you where the routing does not touch South Africa. For example a Nairobi / Lagos / Nairobi ticket. This offering is exclusive to our corporate clients and ensures that one call really can do it all.

On-demand reporting

At Corporate Traveller we believe in efficient, accurate and relevant reporting. This is why we are giving you access to an online reporting tool that will place key indicators and invoice copies right at your fingertips.

Available reports include:

- Detailed airline, car hire and hotel reports per passenger
- Travel spend reports
- Monthly and yearly management reports
- Routing and supplier reports
- Copies of invoices and credit notes

All reports, invoices and credit notes can be printed or exported to Word, Excel or PDF.

At Corporate Traveller we strive to offer you technology and benefits that will enhance the way you do business and how you control your travel spend. Feel free to call your travel manager or customer relationship manager to discuss any of the above options further.
