

Sustainability and Corporate Travel

Join Corporate Traveller on our journey to Net Zero

Did you know you can advance your organisation's environmental, social and governance (ESG) goals through your corporate travel programmes?

Corporate Traveller is leading the way to a greener and more sustainable future.

Corporate Traveller has committed to Net Zero by 2050.

Protecting our environment is essential to the future of tourism. As part of FCTG, one of the world's largest travel groups, we are well-positioned to play a role in affecting this kind of positive change where we work, live and travel.

What is Net Zero?

Net Zero is the cutting of greenhouse gas emissions to as close to zero as possible, with any remaining emissions re-absorbed from the atmosphere by oceans and forests, for instance.

Why is Net Zero important?

The Earth is 1.1°C warmer than it was in the late 1800s. To keep global warming to no more than 1.5°C - as called for in the Paris Agreement - emissions need to be reduced by 45% by 2030 and reach Net Zero by 2050.

Corporate Traveller's global giving footprint has grown more than 20% annually for the past three years.

Every time you book with us, you're helping us support greener, safer, and more respectful travel.

How Corporate Traveller helps you improve Sustainability

1
